Professional Preparation

B.S. Engineering (high honors) - Environmental Science Specialty, Colorado School of Mines 2006.

M.S. Environmental Engineering - Biotechnology and Environmental Microbiology Emphasis, Colorado School of Mines 2009.

PhD Environmental Science and Engineering Division, Colorado School of Mines 2012.

Relevant Experience

Proficient with **Python**, **R**, Latex, Bash scripting and **Linux system administration**. Experience with Perl, JavaScript, PostgreSQL, MySQL

Thorough understanding and fluent with many data science/bioinformatics tools including IPython notebooks, GGPlot2 (R), Matplotlib (Python), Pandas (Python), phyloseq (R), plyR/dplyR/tidyR (R) , QIIME, Mothur, Khmer, and BioPython. Experience with Bokeh (Python), D3.js (my bl.ocks: bl.ocks.org/chuckpr), ggvis (R) and lattice (R).

Taking online courses for the **Data Science Signature Track** with Coursera – Received verified certificate with distinction for The Data Scientist's Toolbox, R Programming, Exploratory Data Analysis, Statistical Inference, and Regression Models courses.

Experience developing amplicon sequencing protocols from the ground up for next-generation-sequencing technologies (454 and Illumina) with SSU rRNA genes and Fungal ITS amplicons.

Appointments

Research Assistant, Environmental Science and Engineering Division, Colorado School of Mines (2006-2012)

Postdoctoral Researcher, Department of Crop and Soil Sciences, Cornell University (2013-present)

Teaching Fellow, Marine Biology Laboratory (Microbial Diversity Course) (2010-2014)

Awards and Fellowships

2015 Poster Prize, AEM Gordon Research Seminar

2010, 2011, 2012 and 2013 Teaching fellow for the Microbial Diversity Course at the Marine Biological Laboratory, Woods Hole. Course Directors: Daniel Buckley and Steve Zinder.

2006 Outstanding Graduating Senior Award, Colorado School of Mines - Environmental Science and Engineering Division

2005 and 2006 Department of Energy Science Undergraduate Laboratory Internship (SULI) at Idaho National Lab

2006 Idaho National Lab Undergraduate Scholarship

Invited Talks

^{14} C and microbial diversity study of Yellowstone siliceous stromatolites: searching for the depositional community. 2009. Microbiology Supergroup, University of Colorado - Boulder.

Cyanobacterial construction of finely laminated siliceous stromatolites in a Yellowstone National Park hot spring. 2012. Astrobiology Science Conference - Microbes in Lithifying Systems.
